## **QULLIQ ENERGY CORPORATION**

Qulliq Energy Corporation (QEC) is entrusted to provide safe, reliable power to all customers in Nunavut. Owned by the Government of Nunavut and operated as an arms-length territorial corporation, QEC is the sole provider of electricity and district heating in Nunavut. In comparison to other utilities in Canada, QEC faces unique challenges as it operates 25 stand-alone diesel power generation facilities and distribution systems located in each of the territory's communities.

### **QEC-19-008 Control and Automation System Engineer**

Based out of Iqaluit, Nunavut and reporting to the Manager, Electrical Engineering the Control and Automation System Engineer is accountable for the integrity, reliability, and operability of all automation and control designs within the Corporation. This position will advise on automation and control matters to ensure safe, reliable & efficient operations as well as compliance to all provincial and federal codes and standards.

#### **Duties and Responsibilities:**

- Performs detailed electrical engineering design and analysis including but not limited to new installations, modifications of plant main control panels (switchgear, etc.), electric motors with Variable Frequency Drives (VFDs), Programmable Logic Controllers (PLCs), Gen-sets instrumentations, exciters, voltage regulators, breakers & associated controls.
- Resolves complex electrical issues and provides support for investigations and emergency field repairs.
- Supports capital projects during commissioning by providing technical expertise and Project Management services.
- Prepares preliminary and final detailed designs for PLC, SCADA, related communication systems and automation.
- Supports departmental design quality assurance processes and performs independent reviews of design work completed by designers, engineering consultants, and CAD technicians.
- Provides technical and operational support and advice to field personnel for issues related to electrical systems, PLC controlled automation systems, communications systems, protection coordination studies, relay settings, and other related systems.
- Serves as Project Monitor and performs on-site supervision, inspection, performs or witness commissioning.
- Prepares progress reports and technical reviews.
