Plant Operator

Iqaluit, NU – Ref. No. QEC-17-004

If you're a self-starter with an electrical and/or mechanical background and the ability to perform basic repairs and work with minimal supervision, don't miss this opportunity to play a valuable role in ensuring the delivery of safe, reliable electrical services through effective plant operations and maintenance.

Reporting to the Assistant Operations Supervisor, you will be responsible for maintaining safe, continuous power generation and distribution, integrating production and maintenance requirements of all mechanical and electrical equipment under your jurisdiction. As a Plant Operator, you will also be expected to operate and monitor the diesel powerhouses and associated systems to provide safe, reliable electrical service to Qulliq Energy customers in the community in a cost-effective manner.

This position involves heavy lifting and may require working at heights, such as on ladders, scaffolding, radiator stands and building roofs.

DUTIES AND RESPONSIBILITIES INCLUDE:

- Operating the plant to provide the most efficient use of equipment;
- Requesting repairs and/or replacement, or emergency repairs, as required;
- Performing minor preventive maintenance;
- Monitoring fuel transfers to ensure safe, expedient delivery according to IAW fuel transfer procedures;
- Identifying complex issues and referring them to the Plant Superintendent and/or Area Operations Supervisor;
- Performing your own duties in compliance with Occupational Health & Safety and WHMIS legislation;
- If required, directing the activities of casual staff, including assigning duties;
- Re-ordering routine material for plant operations, maintenance and staff;
- Assisting area maintenance or contract maintenance crews in the completion of projects through scheduling, monitoring and actual hands-on assistance;
- Ensuring that all safety and emergency equipment is maintained to prescribed standards;
- Providing information to the Plant Superintendent and/or Area Operations Supervisor for the preparation and submission of performance measurements;
- Conducting plant checks, as required, to ensure that there are no issues requiring immediate attention;
- Coordinating, with the Warehouseman, the preparation of waste material for the annual sealift;
- Carrying out housekeeping duties to ensure a clean, secure and safe work environment;
- Maintaining the Plant Yard and Fuel Berm to a high level of operational readiness and cleanliness; and
- Performing other duties, as assigned.

REQUIRED QUALIFICATIONS INCLUDE:

- High school education – minimum of Grade 12;
- A related journeyman certificate in the electrical / mechanical trades or an equivalent configuration of related education and experience;
- Experience in the production and distribution of power;
- Manual skills to complete basic repairs;
- Ability to communicate effectively, verbally and in writing, in English and Inuktitut;
- Self-motivation, with the ability to work with minimal supervision;
